

SENTYR project is focused on the development of quality training materials and delivering entrepreneurship and self-awareness training to youth groups in risk.

As a youth worker or youth organization, you can benefit a lot from the research work developed in this project. The results and the methodologies are opened so that anyone can use it, through our web page.

We worked for reaching our aim through implementing several specific objectives:

 We designed, developed and piloted evaluation methodology and training methodology

 We trained youth workers/multipliers from partner countries to deliver SENTYR training

 We conduct ongoing dissemination campaign of project activities and results, including 1 international multiplier event.
